EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

IN THE TITLE

The title has been changed to be reflective of the claimed invention. The title now reads:

---APPARATUS FOR THINNING UPSTANDING SIDES OF METAL SHEETS---

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: One reason for allowance is that prior art of record does not show the claimed apparatus *inter alia* for bending a metal sheet having upstanding *sides* where for *each* upstanding side a rolling device with a *pair* of rollers for selectively thinning a part of the upstanding side of the metal sheet is provided with a *rolling force* and the *angle* between the axes of the pair of rollers of the rolling device being adjustable for *selectively thinning a part of the upstanding sides* and with the rolling devices being movable towards and away from each other for adaptation to the *width of the metal sheet*. While Atsunori shows that the rolls 3 and 4 can be adjusted (see Figures 2 and 4) to vary their angles, thus, thinning the parts of the upstanding sides, Atsunori does not show that for each upstanding side 12b and 12c, a pair of rollers for selectively thinning a part of the upstanding side of the sheet metal is provided. Atsunori's rollers 3 and 4 cooperate with a roll 1 but do not

permit adjustment between the rolling devices such that they are movable towards and away from each other for adaptation to the width of the metal sheet. While the secondary teachings show a pair of rollers for each upstanding side of the metal sheet, the secondary teachings to Olson and Utashiro do not show adjustability of each pair of rollers to an extent that selective thinning can be produced in the upstanding sides. Furthermore, Olson and Utashiro show rolling devices for each upstanding side that *bend* the part of the upstanding sides but not a thinning of the part of the upstanding sides. Thus, it is maintained that the secondary teachings do not correct the failings of the primary teaching.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
